

## Topic – Geography

We are starting to look at natural disasters as part of our Geography topic. Research natural disasters (volcanoes, earthquakes, hurricanes, tsunamis, typhoons, landslides, flood, bushfires etc)

Think about:

- How they are formed
- What countries you can find them in
- Why they happen
- The impact of a natural disaster in the area to the land, people and wildlife.

## Possible Activities:

Fact files

PowerPoint presentations

Newspaper articles

Diary/recount from a person experiencing natural disaster

Poster

Leaflet

Write a story based around a natural disaster

We can't wait to see what you come up with!
