

Answers

Work out the calculations below and put the answers in the boxes.

$$1. \quad \frac{1}{2} \times 7 = \boxed{\frac{7}{2} = 3 \frac{1}{2}}$$

$$6. \quad \frac{2}{3} \times 8 = \boxed{\frac{16}{3} = 5 \frac{1}{3}}$$

$$2. \quad \frac{2}{3} \times 4 = \boxed{\frac{8}{3} = 2 \frac{2}{3}}$$

$$7. \quad \frac{5}{6} \times 9 = \boxed{\frac{45}{6} = 7 \frac{3}{6} = 7 \frac{1}{2}}$$

$$3. \quad \frac{3}{4} \times 5 = \boxed{\frac{15}{4} = 3 \frac{3}{4}}$$

$$8. \quad \frac{5}{8} \times 4 = \boxed{\frac{20}{8} = 2 \frac{4}{8} = 2 \frac{1}{2}}$$

$$4. \quad \frac{3}{5} \times 3 = \boxed{\frac{9}{5} = 1 \frac{4}{5}}$$

$$9. \quad \frac{1}{2} \times 6 = \boxed{\frac{6}{2} = 3}$$

$$5. \quad \frac{2}{4} \times 6 = \boxed{\frac{12}{4} = 3}$$

$$10. \quad \frac{4}{8} \times 7 = \boxed{\frac{28}{8} = 3 \frac{4}{8} = 3 \frac{1}{2}}$$
